SprayMax® 1K UNIFILL S2 500 ml Art. Nr. 680410

Product

Description / Purpose

Properties

Material base

Gloss level

Colour

VOC Value (EU)

Primer Filler that is suitable for sanded-through areas with high layer thickness. Suitable for steel, galvanised steel, aluminium, various plastics

- High layer thicknesses
- Fast drying
- Fast layer thickness build-up
- Corrosion protection
- Can be topcoated with waterborne paint

Acrylic resins

Light grey

matt

710 g/l

Substrate

Steel (cleaned and sanded)

Galvanised steel (hot-galvanised, strip galvanised and electro-galvanised cleaned and sanded)
Aluminium, soft aluminium (cleaned and sanded)
Various Plastics (PVC, PPO/PA, ABS, PC/PBT)

Due to the large number of plastic types, compatibility with the substrate has to be tested before in each individual case.

Polyester surfaces (cleaned and sanded)

Old paint and factory paint (cleaned and sanded)

The damaged area must be dry and free of grease and dust and all rust needs to be removed.

Processing

Protection measures

Wear personal protection equipment.
(respiratory mask/gloves/goggles)
For more information, see safety data sheet.

Shake

Shake can thoroughly for at least 2 minutes from when the mixing balls are heard.

Adjustable Nozzle

Set the variable spray nozzle to the size and pattern of the damage.

Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

Spraying distance

10 cm - 15 cm

Spray passes

Dry film thickness 80 µm (approx. 2 - 3 spray coats)

Flash-off time

Flash time: between 2 spray coats (until matt)

Processing conditions

Optimum application at 18°C - 25°C and a relative humidity from 40 - 50 %.

Drying

TG1 dust dry: 3 min

TG3 dry to touch: 8 min Ready for sanding: 20 min

The stated values refer to the above-mentioned processing conditions. The level of dryness is determined pursuant to DIN 53150.

Continue

Can be topcoated with all conventional 1K or 2K top coats, and solvent and water-based paints.

Check compatibility with the surface.

For dry sanding with a machine, the use of soft discs with foam backing is recommended.

Wet sanding with P 600 to P 1200 Sanding by hand with P 400 to P 500

Finish

After painting, turn the can upside down and spray the valve until empty.

Additional Information

Important Information

Not suitable for plastic parts made from PE, PP, pp blends like PP/EPDM and polystyrene (e.g. Styropor®).

Use SprayMax® 1K Plastic Adhesion Promoter 680009 first. Do not use on thermoplastic paintwork. Do not topcoat with 2K UP putties.

Shelf Life

60 months

The usage period refers to an unused can that is stored correctly at a temperature of $15-25\,^{\circ}\text{C}$ and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

Disposal

The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.

Note

For professional use only.
